COURSE DESCRIPTION

My teaching goals for this seminar are for students to be exposed to: a variety of issues related to journal publication in Sociology (such as types of journals, indicators of journal quality, issues related to collaboration); the experience of writing an article for submission to a journal; and reviewing articles for journals.

COURSE REQUIREMENTS

To achieve these goals, I will require several things from you:

1) **Preparing an article for submission to a journal.** You should start with a paper that you have already written for a class, conference, or Master’s paper, and prepare a revision of this paper that is suitable for submission to a journal (ideally by April 21, the last day of class). In order to facilitate this, each participant is expected to carry out a number of exercises that we will discuss in class (e.g., writing an introduction and abstract, writing a literature review, describing methods and data, presenting results, writing a conclusion).

2) **Class participation.** I expect you to come to the seminar and take active part in discussions of seminar topics, do the assigned readings, and do reviews of other students’ papers.

I will also invite a number of Sociology faculty members and advanced graduate students to visit selected classes to share with us their perspectives on publishing in journals. A schedule of visits will be posted on the Sakai course website.

My office hours are Tuesday and Thursday, 2:00-3:00 pm and by appointment.

READINGS

In addition, I will ask you to read a number of articles, which can be accessed through the Sakai Course Web Page.
